

# Ceglu™ dish, 100mm

Cat. Code: ASD1000001 10 dishes / box

Ceglu<sup>™</sup> is a chemically defined, animal-origin-free scaffold material with excellent homogeneity and storage stability. Ceglu<sup>™</sup> dish is optically clear and pre-coated with Ceglu<sup>™</sup>, making them ready to use upon opening to support optimal stem cell culture.

## **Properties**

- Storage: Store at 1-30 °C.

- Shelf Life: Stable until expiry date on label.

#### **Precautions**

- Single Use Only:

This product is designed for single use only. Do not reuse.

- Intended Use:

This product is for research purposes only and should not be used for therapeutic or diagnostic purposes. The product may not be sold to a third party or used for commercial purposes without our permission.

- Gamma Irradiation Notice:

Yellowing may occur due to gamma irradiation. However, this does not impact its performance.

- Handling Instructions:

Avoid damaging the culture surface by scratching it or exposing it to prolonged sunlight or UV light.

# Key Features

- Safety:

Ceglu™ is a fully chemically synthesized scaffold and contains no animal-derived materials. It is also a hydrophobic polymer, which reduces the risk of leaching during culture.

This product is Gamma-sterilization and Non-pyrogenic.

- Stability:

It can be stored for long periods at room temperature.

- Culture Quality:

This product enables attachment and proliferation of stem cells and maintenance of undifferentiation.

## How to use

User Guide:

We have published the protocols to culture stem cells on Ceglu™ multiwell plate on our website.
